

SHIVDARSHAN JHA

Java Developer | Software Engineer | Core Java | Backend Development | BFSI Domain
Delhi, India | +91-9625660308 | kumarshiva8665@gmail.com | [linkedin.com/in/shivdarshan-jha-16a05a1a0](https://www.linkedin.com/in/shivdarshan-jha-16a05a1a0)

PROFESSIONAL SUMMARY

Java Developer and Software Engineer with 4+ years of experience in Core Java, J2EE, REST API development, and backend enterprise application development in the Banking, Financial Services, and Insurance (BFSI) domain. Expertise in Object-Oriented Programming (OOP), Collections Framework, Exception Handling, Multithreading, SQL query optimization, stored procedures, and system integration. Experienced in deploying and supporting applications on JBoss and WebLogic application servers. Proven track record of delivering scalable backend systems, REST APIs, and enterprise integrations for critical banking projects. Strong production support background with consistent recognition for performance excellence.

TECHNICAL SKILLS

Programming Languages: Core Java, J2EE, JavaScript, JSP

Core Java Concepts: Object-Oriented Programming (OOP), Collections Framework, Exception Handling, Multithreading, JDBC

Web and API Development: REST API Design and Development, Web Services, System Integration, Third-Party API Integration, JSON and XML Processing

Web Technologies: HTML5, CSS3, JSP (JavaServer Pages)

Database and SQL: MS SQL Server, Oracle Database, MySQL, SQL Query Optimization, Stored Procedures, Database Performance Tuning

Application Servers: JBoss, WebLogic

Tools and Platforms: SVN (Version Control), Postman (API Testing and Validation)

Domain Expertise: BFSI (Banking Financial Services and Insurance), NPA Settlement Processing, Loan Origination System (LOS), Collection Management System (CMS)

SDLC and Practices: Agile SDLC, Production Support, Issue Resolution, Change Request Management, Feature Enhancement, Code Review, Application Debugging

PROFESSIONAL EXPERIENCE

Software Engineer

Newgen Software Technologies Ltd.

Feb 2022 – Present

Delhi, India

Client 1: Punjab National Bank (PNB) — Settlement Proposal Processing System (SPPS)

Domain: Banking | NPA Management | Stack: Core Java, J2EE, REST API, MS SQL Server, Oracle Database, JBoss

- Engineered Java-based backend modules for the Settlement Proposal Processing System (SPPS) for NPA accounts, compliant with banking regulations and One-Time Settlement (OTS) guidelines, automating financial decision workflows.
- Designed and implemented business logic using Core Java and J2EE with OOP principles, Collections Framework, and Exception Handling to automate financial validations and approval pipelines.
- Developed, tested, and maintained REST APIs and Web Services for integration with internal banking systems, enabling real-time data exchange and enterprise interoperability.
- Optimized SQL queries and stored procedures on MS SQL Server and Oracle Database, delivering measurable improvements in data retrieval speed and application performance.
- Deployed and managed enterprise applications on JBoss application server, ensuring smooth production releases and high system availability.
- Provided production support and root-cause analysis for critical banking applications, maintaining SLA compliance and resolving incidents in a timely manner.

- Collaborated with business analysts and QA teams through complete Agile SDLC cycles from requirement gathering to User Acceptance Testing (UAT).

Client 2: Abdul Latif Jameel Finance (ALJUF) — Loan Origination and Collection Management System

Domain: FinTech | Loan Processing | Stack: Core Java, REST API, Oracle Database, WebLogic

- Contributed to full-cycle development of Loan Origination System (LOS) and Collection Management System (CMS), supporting end-to-end loan processing and collection workflows for high-volume financial operations.
- Developed Java backend modules with optimized database logic on Oracle Database to handle large-scale loan data processing with accuracy and high performance.
- Implemented enterprise system integration with internal platforms and third-party services using REST Web Services and JSON/XML-based API communication.
- Designed and maintained REST APIs to facilitate communication between distributed enterprise systems, improving data consistency and reducing integration latency.
- Delivered feature enhancements and change requests within sprint timelines, ensuring zero-defect production deployments on WebLogic application server.
- Conducted peer code reviews and debugging sessions to maintain code quality, enforce best practices, and minimize technical debt.

AWARDS AND RECOGNITION

- Rising Star Award — Awarded by Newgen Software Technologies for outstanding performance, exceptional technical contribution, and delivery excellence on enterprise BFSI projects.
- High Five Award (3 Times) — Recognized three consecutive times for consistently high-quality deliverables, strong team collaboration, and proactive ownership of critical production tasks.

EDUCATION

B.Tech – Information Technology

Dr. Akhilesh Das Gupta Institute of Technology & Management

CGPA: 9.41

2018 – 2022
